PASSMAN

WHY IS PRIVILEGED ACCESS RISKY?

By leaking the passwords of privileged users, critical systems become vulnerable.

80%
of security incidents involve privileged accounts.

40%
of organizations store privileged passwords in Excel files.

76%
of attacks result from weak or stolen passwords

WHO ARE PRIVILEGED USERS?

- Sysadmin
- Database manager
- Application developer
- Data Center manager
- IT auditor
- IT security expert
- Network engineer

WHY ARE THEY RISKY?

- They are indispensable operators of critical systems
- They have full rights
- They have shared accounts
- They have no individual accountability
- They have no activity tracking

HOW CAN YOU MANAGE PRIVILEGED ACCOUNTS SECURELY?

- Encrypted vault
- Role-based access
- Activity tracking
